Transferable Skills Training Newsletter

Man on top of the mountain
(Image: pexels.com)

Dear doctoral candidates,

Even when it's exciting to think about all the different paths and possibilities you can take in the world of science, this might be as well an overwhelming thing. We at [TUM Graduate School](#), would like to help you visualize clearer the broad career opportunities outside science and research - whether in industry or the public sector. Within our [Transferable Skills Training](#), courses such as [Wege aus der Wissenschaft](#), can help you to clarify your professional competence profile concerning the non-university job market, so you can start generating ideas about which job options can be derived directly from your set of transferable competencies. We'll dig deep into your skills, strengths, and knowledge acquired through your doctoral journey. Whether you are about to finish your doctorate or simply curious about the possibilities of the future, you will obtain relevant

and up-to-date information on job hunting, networking, and applying for jobs outside academia. The goal is to uncover a whole range of career paths that are perfectly suited to your unique talents and aspirations.

For more courses like this, feel free to check our [page](#) and register via [DocGS](#). Keep an eye out for more exciting updates with our [Transferable Skills Training Newsletter](#). For more information about the TUM Graduate School, have a look at our [website](#) and stay updated with this newsletter.

What's new?

Kick-Off Seminar: Registration opens on June 7th, 2023

Don't miss the chance! From June 7th, midnight, you can register for more TUM-GS [Kick-Off Seminars](#) from September to December 2023. During the 3-day-Kick-Off Seminar, which takes place in the *Science and Study Center Raitenhaslach*, you will not only get interesting information about the academic work and the diverse offerings at TUM, but also it's an excellent opportunity to meet other fellow doctoral candidates from different disciplines, gain new perspectives and expand your personal network. Don't wait until the last minute and choose the respective semester to sign up for this great event!

Survey on the Transferable Skills Training experience: Writing & Yoga Retreat

We at TUM Graduate School want to continuously improve our course offering. From time to time, we have some specific questions about how to improve our courses. This time, we would like to further tailor our "Writing and Yoga Retreat" to make it an even better experience. Would you like to give your input? It will not take more than 5 minutes. Thank you in advance! 😊

Inside the courses

Personal Energy Protection (PEP® Health)

What feeds the energy tank? In this workshop, the following energy fields will be discussed: body, core and head. Participants will recognize when it is time to specifically address potential overloads and will be equipped with individual tools to stay mentally and physically healthy and productive, which can be easily integrated into the everyday life. With this seminar, you will build your ability to stay healthy and productive despite high and diverse stresses. PEP Health has been successfully implemented in companies such as Allianz SE, Swiss Life, MHP- A Porsche Company, DKFZ, Roche Diagnostics and Freudenberg.

Successful Management in a Global World

This workshop covers culture specific knowledge (East-West: USA:Europe - Asia) in relation to international management. The awareness of communication, management and leadership methods in different cultures will be raised. Culture related techniques and behaviors are explained and trained in role-plays and exercises. Different management practices in business situations will be addressed. Some of the course aims are to learn about culture dimensions for different countries, acquire management and communication skills, understand the impact of culture on management functions in different cultures, be aware of business etiquette in foreign countries, increase awareness with people from different cultures and much more...

Wissenschaft verständlich kommunizieren

Explaining complicated relationships clearly and breaking them down to the level of the audience is a major challenge for scientists. The language must be appropriate for the target group. Images and analogies should be chosen to illustrate the connections. Nevertheless, the explanations must meet scientific standards. A solid preparation and a good feeling for the addressees are essential. This workshop provides general background on text and language comprehensibility and on the development of explanatory approaches. Using their own research work as an example, participants practice presenting complicated content in a comprehensible way and finding and inventing suitable comparisons and images.

Performing Under Pressure

Academia is a high-pressure and competitive environment. Academics are expected to excel at everything: their research, publications, teaching, and the impact they are making in their field. While men and women respond differently to pressure and stress, both can suffer from imposter syndrome. So, how can we feel comfortable, confident, and in control in our own skin? A large part of becoming pressure proof is learning how to deal with rejection and rigorous academic standards while performing at the highest possible level. In this workshop, participants explore the different ways of dealing with pressure and stress; learn practical skills for coping, focus and productivity and others.

Picture of a handwritten text (Image: pexels.com)

On one hand, this seminar focuses on reflecting on the role of a facilitator: What are you allowed / should / must do in this function? On the other hand, the focus is on the interaction within the group: How do you proceed if the prepared concept does not work or the participants are hostile to each other? What can I do as a participant to stop an unconstructive exchange? Methods for leading discussions are just as helpful here as techniques for absorbing and channeling group dynamics.
